

# AFP310 Series

If you are looking for a hassle free, longer lasting solution to buying and schlepping bottled water, then this triple tank water filter is for you.

The high performance media of AFP310, with its multi stage filtration process, provides you and your loved ones pure sparkling water from the tap.

This water filter is custom designed for greater efficiency in reducing and removing contaminants and improving the taste and odor of your tap water. That means your water will be free from many

impurities and will have a spring-like feel to it.

In addition, the filter is designed to last much longer than most carbon filters, resulting in less frequent cartridge replacements. Although this submicron filter removes harmful elements from your water, it leaves the beneficial minerals in your water - a great alternative to a Reverse Osmosis system.

## Under-the-sink model

*Includes everything necessary for installation and mounting*

*Countertop model*

## PRODUCT FEATURES AND BENEFITS

- Includes a Doulton SuperCarb™ ceramic cartridge – known for its high quality and efficiency.
- Retains beneficial fluoride and minerals in water while still maintaining filtration quality
- Provides a highly noticeable improvement in water taste and quality
- Needs cartridge replacements only once a year or after processing up to 5,000 gallons of water (2,000 gallons for lead removal)
- Tested according to US-EPA Guide Standard and Protocol for Testing Microbiological Purifiers
- Exceeds NSF Standard No. 42 for Chlorine/taste and odor reduction

## PRODUCT DETAILS

- 0.2 Micron filtration – effectively reduces E. Coli, Shigella, Salmonella, Cholera, cysts, asbestos, particulates, lead, and mercury
- Water passes through 2+ lbs of activated carbon, resulting in significant reduction of Chlorine, THM/TTHM, Pesticides, Organic Chemicals, and many other pollutants
- Filtration through a combination of high quality GAC carbon, carbon block, and Doulton self-sterilizing ceramic.
- Outer dimensions : 11" X 13½ " X 4½"

*continued on back*

# AFP310 Series

Healthy.  
Drink  
Better.

## TECHNICAL DETAILS:

### The AFP310 Series contains:

2 pure carbon cartridges and a Doulton SuperCarb™ ceramic cartridge:

The pre filter cartridge includes a 2-stage process: sediment and particle reduction down to 5 micron, and Granular Activated Carbon (GAC) for additional purification. This cartridge features a patented spring-loaded device that compresses the carbon into a compact block, and maintains it under ideal pressure. This eliminates channeling; the water flow is distributed evenly so that the water is thoroughly filtered.

The middle filter cartridge includes a 2-stage process: fine sediment and particle reduction down to 0.5 micron, and a multi-purpose briquette consisting of activated carbon, which has been bonded with a special agent for the reduction of lead. The briquette's special design ensures an even flow throughout both stages for thorough filtration.

The third filter cartridge includes a 2-stage process: ceramic filtration with self-sterilization properties for super fine filtration down to 0.2 micron, and activated carbon for additional water purification and polishing.

The filter's 6-stage filtering process features a 0.2 micron filtration – an ideal size for removing waterborne bacteria (i.e. Cysts). The water passes through over 2 lbs. of activated carbon, resulting in a very thorough filtration for chemicals (i.e. chlorine, pesticides, THM, etc.) and taste.

The AFP310 Series has a 5,000 gallon capacity (2,000 for lead reduction). Replace cartridges when using filter capacity or annually (whichever is first).

The AFP310 Series also features tough polypropylene housings and brass fittings to ensure system durability and longevity.

## RECOMMENDATIONS:

- For areas with high sediment content in the water, use a sediment pre-filter.
- For replacement cartridges, use model RK310

## PRODUCT MODELS

Available in counter top (AFP310CT) and under the sink (AFP310FC) varieties.

Under the sink system Model AFP310F includes:

- Complete installation kit
- Filter housing wrench
- Easy instructions manual
- Attractive chrome faucet (Model 112/CH) with all necessary hardware.

Counter top system Model AFP310CT includes:

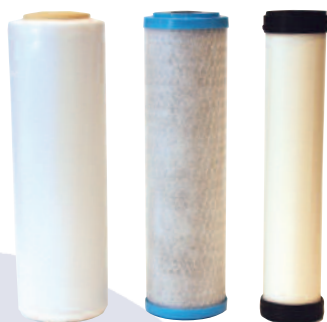

- Complete installation kit
- Filter housing wrench
- Easy instructions manual

## PRODUCT AVAILABILITY:

AFP310CT and AFP310FC can be purchased through your local dealer, at amazon.com, or directly from us.

## WHAT MAKES AFP310 SUPERIOR TO OTHER WATER FILTERS?

- The filtration system combines 'GAC Activated Carbon Technology,' 'Powerful Lead Reducing Technology,' 'Activated Carbon Block Technology,' and 'Doulton SuperCarb Ceramic Technology' to produce the best possible filtration for many common contaminants.
- Our systems have enough activated carbon to purify your water thoroughly.
- Aqua Filter Plus uses only top grade activated carbon for best performance.
- Our filtration systems are proudly made in the USA
- Aqua Filter Plus systems are made to last – for years of superb service.

RK310 cartridges

### Reduces the following contaminants:

- |   |                                     |   |
|---|-------------------------------------|---|
| • Particulate matter down to 0.2 micron | • Cholera                           | • Pesticides (Linden, 2 4-D)            |
| • Chlorine, taste, and odor             | • Trihalomethanes (THM/TTHM)        | • Giardia and Cryptosporidium           |
| • E. Coli                               | • Lead (dissolved and suspended)    | • Cysts (waterborne microbes-parasites) |
| • Shigella                              | • Volatile Organic Chemicals (VOCs) | • Asbestos                              |
| • Salmonella                            |                                     | • Turbidity                             |
| • Klebsiella                            |                                     |   |
